

SCENIUM

D61W130

61" (Diagonal) 16x9 HDTV Monitor with High Contrast Tinted Screen/Shield

Features	Benefits
Progressive Scan	Digitally combines two fields of video into one high-resolution image frame. Creating a smooth film-like appearance.
3D Y/C Digital Frame Comb Filter	Separates the signal into separate components eliminating dot & edge crawl while providing better transitions between scene changes.
IntelliFocus™ Digital Auto Convergence	Digitally optimizes convergence for the sharpest picture possible.
Dual HD Component Inputs (SYNCROSCAN™)	Auto-adjusting inputs allow a wide array of component compatible equipment (e.g. DVD/ Satellite) to be connected simultaneously. Helps simplify hook-up process.
DVI Input with HDCP - New Connectivity	DVI-HDTV allows transmission of (uncompressed digital) video signals from a set-top box to a digital TV. DVI delivers the purest digital transmission available today.
Sub-Woofer Output	Allows powered sub-woofer to be connected directly to the TV without the need for a separate audio receiver.
Virtual Dolby ²	Uses the TV's left & right speakers to simulate surround sound and create a "live performance" experience.
